

Anbefaling af Mathias Foght Rasmussen

Mathias har i sin praktikperiode hos IMPACT som frontend engineer praktikant gjort et særdeles positivt indtryk. Han har vist sig som en utrolig lærenem og motiveret praktikant, der ikke er bange for at udfordre sig selv og status quo.

Under sin praktik har Mathias blandt andet bygget en funktionel webshop i Next.js-frameworket, hosted på Vercel. Dette er særligt imponerende, da han begyndte med begrænset viden om både Next.js, React og frontend hosting, men på kort tid opnåede en bred forståelse af teknologierne. Webshoppen er integreret med en mock backend og håndterer dynamiske sider, som eksempelvis genereres fra et CMS.

Funktionaliteten inkluderer blandt andet muligheden for at tilføje produkter til en kurv og gennemføre et checkout-flow. Derudover kan brugerne logge ind i systemet, gemme favoritprodukter og administrere deres profil. Webshoppen er designet til at tilbyde en brugervenlig og interaktiv oplevelse, der gør det nemt for kunderne at navigere og handle.

Det er værd at fremhæve, at meget af implementeringen bygger på Mathias' egne idéer, hvilket understreger hans kreative og løsningsorienterede tilgang til opgaverne.

Som kollega udstråler Mathias energi og godt humør, og han er altid klar til at tage nye udfordringer op med en positiv tilgang. Det har været en fornøjelse at arbejde sammen med ham, og vi er overbeviste om, at han vil være en værdifuld ressource for sine fremtidige arbejdsgivere.

Jeg kan varmt anbefale Mathias og ønsker ham al mulig succes fremover!

Recommendation for Mathias Foght Rasmussen

During his internship at IMPACT as a Frontend Engineer Intern, Mathias made a very positive impression. He has proven to be an incredibly quick learner and a highly motivated intern who is not afraid to challenge himself and the status quo.

During his internship, Mathias built a fully functional webshop using the Next.js framework, hosted on Vercel. This is especially impressive, as he started with limited knowledge of both Next.js, React, and frontend hosting, but quickly gained a broad

understanding of the technologies. The webshop is integrated with a mock backend and handles dynamic pages, such as those generated from a CMS.

The functionality includes, among other things, the ability to add products to a cart and complete a checkout flow. Additionally, users can log in to the system, save favorite products, and manage their profiles. The webshop is designed to provide a user-friendly and interactive experience, making it easy for customers to navigate and shop.

It is worth noting that much of the implementation was based on Mathias' own ideas, which highlights his creative and solution-oriented approach to tasks.

As a colleague, Mathias exudes energy and good humor, and he is always ready to take on new challenges with a positive attitude. It has been a pleasure working with him, and we are confident that he will be a valuable asset to his future employers.

I highly recommend Mathias and wish him all the best in his future endeavors!
